

January 8, 2021

Dear Residents, Family, Friends, and Staff:

We have 1 employee that has tested positive in our bi-weekly testing. The same employee immediately tested negative with a second test. We have ordered an additional test as there is a possibility that the employee received a false positive result. Although it doesn't happen often, false positives and false negatives can occur. We always do confirmatory testing with a positive result. Until a certain result is obtained, this employee is self-quarantining at home.

Please reach out to myself, the Director of Nursing, or your assigned Angel with any questions or concerns.

Sincerely,

Charlene Bedor, Administrator
