

January 11, 2021

Dear Residents, Family, Friends and Staff:

As mentioned in our automated call update today, we had 1 staff member test positive in our bi-weekly testing today. We have also had 3 patients recover and 3 that are doing well and on the road to recovery. We are thankful and appreciative of the prayers and well wishes for our residents and staff.

The second dose of the vaccine will be given on January 26, 2021. Residents that did not choose to take the vaccine during the first clinic, will have the opportunity to take it on January 26, 2021.

You may visit our website for daily updates to our COVID status at solarishealthcare.org/locations/Osceola

As always, your assigned Angel is available to assist in answering questions or concerns.

Sincerely,

Charlene Bedor, Administrator
