

January 9, 2021

Dear Residents, Family, Friends & Staff:

I am writing today to inform you that we have had 3 additional residents test positive for COVID-19 this morning. Those residents have been moved into our COVID positive unit. All residents are being tested immediately with an antigen test that provides a result in 15 minutes. We will continue to test residents frequently to ensure we catch new cases early. Residents that are in the positive unit are unable to have outdoor visitation until they are cleared from droplet precautions.

We will continue to keep you posted on our COVID status through our website and our automated calling system.

As always, you may contact your assigned Angel, myself or the Director of Nursing with any questions. May you continue to be healthy and safe.

Sincerely,

Charlene Bedor, Administrator
