

4/25/21

Dear Residents, Family & Friends:

Welcome to Solaris Healthcare Coconut Creek!

Visitation can be conducted through different means, based on a facility's structure and residents' need. Outdoor visitation is preferred, even when the resident and visitor are fully vaccinated against COVID19, it generally poses a lower risk of transmission due to increased space and airflow. Indoor visitation can occur in a resident's room or designated visitation area. Visits for residents in a shared room should not be conducted, if possible. During indoor visitation, visitor movement should be limited e.g., visitors should not walk around different halls of the facility, interact with other residents, or interact with staff without maintaining social distancing guidelines.

When a new covid case is identified, we will begin outbreak testing and suspend indoor visitation, except for compassionate visitors, until at least one round of facility-wide testing is completed. Please visit our website for the most up-to-date information on covid cases.

Before you have an initial visit, you **MUST** review the education on COVID-19 signs and symptoms, infection control precautions and PPE. Face mask **MUST** be worn during visitation.

Please review the videos below, prior to your initial visit. Once you review the videos, please call the facility to schedule an appointment. If you have any question, please do not hesitate to call, Social Services Director, Gail Kleinfeld, EXT 431

Press 'ctrl' on the keyboard and the link at the same time, to open the videos.
